Durable and Secure

- Industrial grade PLC for ease of serviceability and long service life
- Contactless RFID KFOB provides a durable storage media and security with the addition of a hauler PIN
- Padlockable industrial enclosure

Integration

- Can be retrofitted into your existing system without using new instruments
- Multiple communication options available for SCADA integration
- Customizable to suit your needs

Features

- Flexible fill points – standalone operation
- Simple to use with step by step instructions on front of enclosure
- All components are CSA approved and have appropriate environmental ratings
- All transactions are logged in an Excel format
- Fully insulated enclosure with temperature-controlled heater
- By-pass circuit to disable bulk water dispensing during a fire or backwash

Options

- Air-conditioner for extreme climates
- Stainless steel dead front door
