

## Simplex, Duplex & Triplex Control Panels

### CSA-Certified Solutions for Wastewater & Utility Applications

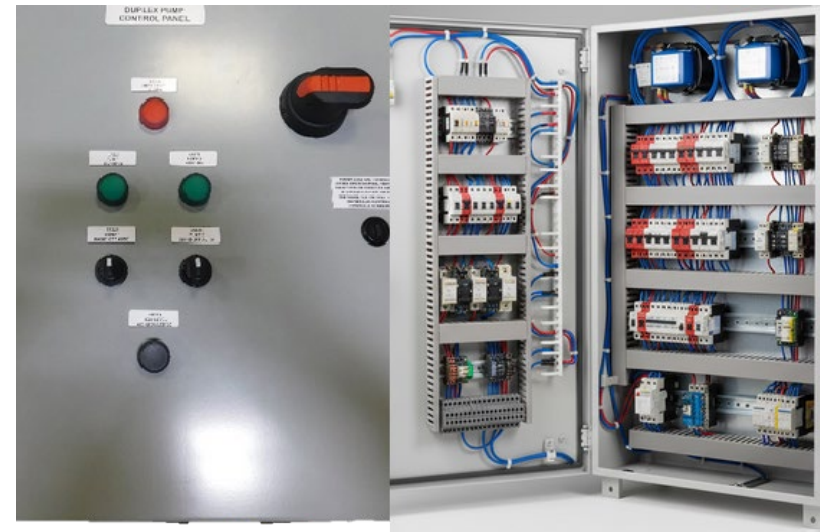

Designed for flexibility and long-term reliability, each panel can be configured to match your exact operational and environmental requirements. From compact indoor installations to harsh outdoor environments, our panels provide safe motor control, accurate monitoring, and clear operator interfaces for uninterrupted operation and simplified maintenance.

#### Why Choose Our Panels

- CSA-certified, code-compliant designs
- Configurable for indoor or outdoor environments
- Clear operator interfaces and reliable monitoring

#### Standard Features:

- Steel enclosure
- Door-mounted disconnect switches
- Low/High level alarms
- Pilot light alarm & status indication
- Remote dry contact alarm & status indication
- Float/pump control logic
- Alarm buzzer
- Hand-Off-Auto switches
- Alarm test/acknowledge pushbuttons
- Inner swing panel (Outdoor)
- Padlocked enclosures (Outdoor)

#### Additional Features such as:

- Stainless steel NEMA 4X enclosure
- Additional float(s) & logic
- LED alarm beacon
- Elapsed time metering
- Pump cycle counting
- Alarm Horn
- Control transformers
- Forward/reverse motor contactors
- Leak/temperature monitor relays
- Oil-sensing
- Receptacle
- Heated enclosure (Outdoor)
- Thermal insulation (Outdoor)
- Auto Dialer
